

1 COUNTERING SPAM THAT USES DISGUISED CHARACTERS

2 Abstract of the Disclosure

3 Computer-implemented methods, apparatus, and computer-
4 readable media for countering spam that disguises characters
5 within an electronic message (1). A method embodiment of the
6 present invention comprises locating (36) portions of an
7 electronic message (1) where the difference between foreground
8 color and background color is negligible; deleting (37) from the
9 electronic message (1) foreground characters from said portions,
10 to form a redacted electronic message; and forwarding (33) the
11 redacted electronic message to a spam filter (23).
